PROFESSIONAL SUMMARY

Third-year B.Tech Computer Science and Engineering student with project experience building a React-based frontend and integrating it with REST APIs. Developed a Context-Aware Retrieval-Augmented Generation (CA-RAG) application using React and FastAPI, with document-question workflows, semantic retrieval, and source citations. Interested in building responsive, maintainable web interfaces and strengthening frontend engineering practices.

TECHNICAL SKILLS

Frontend: React, JavaScript, HTML5, CSS3

Programming: Java, JavaScript, Python, C

Frontend concepts: Component-based development, DOM manipulation, responsive design, asynchronous JavaScript (include only concepts you can explain confidently)

Backend & APIs: FastAPI, Node.js, Express.js, REST APIs

Database: MongoDB

Tools: Git, GitHub, VS Code, Postman, Docker

AI / Retrieval: RAG, FAISS, semantic similarity, vector embeddings, Ollama / OpenAI

PROJECTS

Context-Aware Retrieval-Augmented Generation (CA-RAG) | *Academic Project / Hackathon*

- Built a full-stack application with a React frontend and FastAPI backend for answering user queries about uploaded PDFs.
- Implemented adaptive chunking, query rewriting, and FAISS-based semantic retrieval to retrieve relevant document content.
- Integrated LLM-based answer generation with source citations, similarity validation, and confidence scoring.
- Used MongoDB for document, user, and feedback data, and implemented JWT-based authentication with bcrypt.
- Used Docker to containerize the application for deployment.

Login Validation | *Project*

- Developed a login-validation project using a React frontend and Node.js backend.
- Implemented client–server interaction for the login workflow. (Retain only if this accurately describes your implementation.)

EDUCATION

B.Tech, Computer Science & Engineering — R.V.R. & J.C. College of Engineering, Guntur | CGPA: 7.13/10 | Expected 2027

Intermediate (IPE / Class XII) — Narayana Junior College, Kurnool | 87% | 2023

SSC / Class X — Good Shepherd English Medium School, Nandyal | 6.7 | 2021

CERTIFICATIONS

- Human Computer Interaction — NPTEL (April 2026)
- Quantum Fundamentals — Wiser (February 2026)
- Quantum Algorithm Fundamentals and Hands-on Training — Wiser (June 2026)
- Public Speaking — NPTEL (October 2025)

SOFT SKILLS

Problem solving and analytical thinking | Teamwork and adaptability | Communication
